Request for Re-purposed Computers for Schools

Program Description: The State of Indiana makes "surplus" computer hardware available to educational entities under IC 5-22-21-7.5. Completion of this application in its entirety will place applicants in a pool to receive surplus equipment as supplies become available.

Who can apply: Any school corporation as defined in IC 36-1-2-17 or a nonpublic school as defined in IC 20-10.1-1-3 before July 1, 2005, or IC 20-18-2-12 may apply for computers. If the computers are to be refurbished by another entity (such as a high school or career center preparing computers for an eligible elementary school), this form must be submitted only by the school where the computers ultimately will reside. Information regarding the agent who will refurbish the computers must be included with this form.

What is / is not Included: Desktop computers normally include keyboards, mice and power cord attachments. Laptops will only include the power adapters. Computers do not include the operating system or any applications software. Monitors are not available for repurposed computers. Schools are required to provide the necessary software and monitors to make the computers functional for educational use. Indiana State Surplus does not warranty the usability of the surplus equipment. Schools are also responsible for pick-up and all transportation costs of the hardware.

Schools may wish to contact Net Literacy (www.netliteracy.org), a not-for-profit organization, to help facilitate school's repurposing of computers. Schools seeking to receive XP licenses for donated computers at a cost of \$6.00 per license can contact Net Literacy at donkent@netliteracy.org. Net Literacy also provides schools other resources and programs, including slipstream CDs, service based learning projects, and Internet safety training materials.

Satisfying an Order: Orders will generally be filled by a prioritization of need as expressed in questions appearing in this application. Orders will be limited to 100 computers per order and after that order has been fully supplied, the school may reapply for additional computers. Questions about the program or about the status of pending orders may be directed to bflake@idoa.in.gov

How must the computers be used: The equipment will be used for educational purposes only and may not be sold or donated to anyone. The school must take full accountability for ownership of this equipment through its life cycle use, including the proper disposal of the E-Waste materials. The computers may be loaned to students for use at home on educational projects only and must be returned to the school when the student is no longer enrolled or when the projects are completed.

Certification Requirements: Educational entities must certify their eligibility and must certify the environmental laws with respect to waste disposal once computers are no longer operable or recommendation.
